DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29 and 37-49, drawn to a method and apparatus for steering a beam of light using an acousto-optical deflector and a dispersing element and the use of the deflector and element in a laser scanning microscope, classified in class 356, subclass 318.
- II. Claims 30-36, drawn to an apparatus for spectral dispersion of multi-chromatic light using a dispersing element and mirrors, classified in class 359, subclass 615.

The inventions are distinct, each from the other because of the following reasons:

Inventions I (claims 37-49) and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed as evidenced by independent claims 37, 40, 44, 46, 48, and 49 of Invention I. The subcombination has separate utility such as a dispersive means in a monochromator or spectrometer.

Additionally, Inventions I (claims 1-29) and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a dispersing means in a monochromator or spectrometer. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2877

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
